

Lobular Breast Cancer

Symptoms can mimic other cancers so be aware if the problem persists more than 3 weeks then you need to speak to your GP.

***RED FLAG SYMPTOMS
NEED TO BE REPORTED TO
YOUR ONCOLOGIST**

OVARIAN TISSUE

Can be vague and not specific but mimic other cancers or common illness - Abdominal/pelvic pain, uterine/pelvic bleeding, abdominal swelling/bloating and/or a sense of fluid in the abdomen, hot flushes, leg swelling, bone pain, shortness of breath.

BONE

Pain in bones — commonly thigh, arm, ribs and back. Can be dull ache or sharp shooting pain. Bone pain with no obvious cause or haven't fallen over, report any new, unusual and increasing pain.

GASTROINTESTINAL

Can be vague and not specific but mimic other cancers or common illnesses - difficulty swallowing, abdominal pain, symptoms of a bowel obstruction, feeling full when eating, changes to appetite, nausea and/or a sense of fluid in the abdomen, leg swelling, bone pain, shortness of breath.

Make sure you always tell your doctor that you have a history of Lobular BC in addition to symptoms or take this pdf along to any appointment and explain LBC is more common to spread to the bones, GI tract or ovaries.

OTHER SYMPTOMS

LIVER: Bloating, affected appetite, weight loss, fatigue, weak, pain near ribs on right hand side.

LUNG: Sharp pain on breathing in chest and back area, non productive cough, fatigue, blood clots can also cause shortness of breath.

BRAIN: Frequent headaches, vomiting (first thing in the am), dizzy, visual disturbance, fits, impaired intellectual function, mood swings, balance, fatigue. Family members and friends may say you are not your normal self.

EYE (very rare): Vision changes — especially unilateral, swelling, pain.
